VINORAGE™

Your wine cellar is manufactured by:

Vinorage ApS
Terndrupvej 69
DK-9460 Brovst

CE

THANK YOU FOR PURCHASING A UNDERGROUND VINORAGE WINE CELLAR. WE HOPE YOU WILL ENJOY IT FOR MANY YEARS TO COME.

PLEASE READ THE ENTIRE MANUAL AND THE SAFETY INSTRUCTIONS CAREFULLY BEFORE USING YOUR VINORAGE WINE CELLAR.

GENERAL INFORMATION

Our ambition has been to create a wine cellar with a timeless and elegant design that fits seamlessly into any home. We have designed a wine cellar that keeps your wine collection at a stable temperature all year round. This has been achieved by installing two ventilation ducts from the wall of the wine cellar to the outer wall of your house. With this solution, natural air circulation is created, which, together with the surrounding soil temperature, maintains the ideal range for wine storage. Your Vinorage wine cellar is constructed from stainless steel and fitted with a glass lid that offers a clear view of your wine collection. The glass lid is opened by a low-voltage actuator, controlled by a low-voltage switch mounted on the wall.

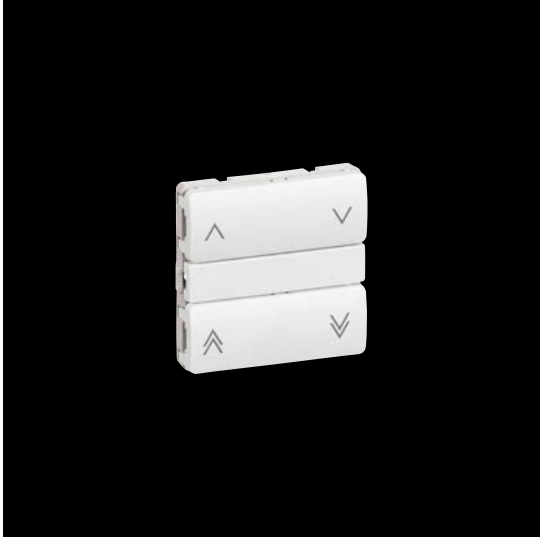
The underground wine cellar features integrated LED lighting along the steel walls, providing both a practical and atmospheric effect without affecting the temperature inside the cellar.

USING THE WINE CELLAR

When your Vinorage wine cellar is installed, a low-voltage control switch will be mounted on your wall.

One set of buttons is used to open and close the cellar lid.

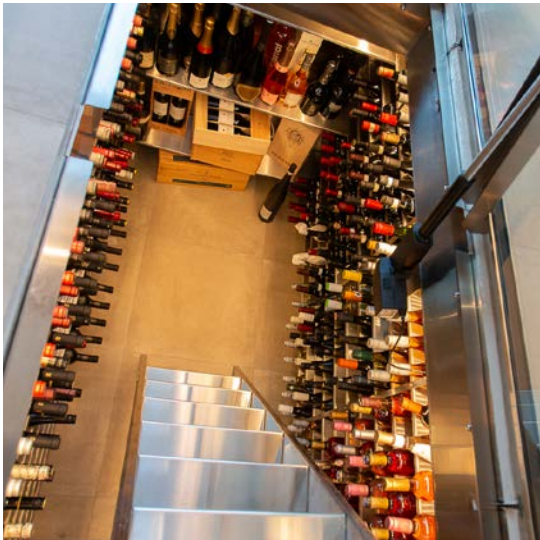
The other set of buttons controls the brightness of the LED strips inside the cellar.



MAINTENANCE

Your Vinorage wine cellar is naturally cooled by the surrounding soil temperature. Therefore, you never have to worry about malfunctions in cooling components.

The only maintenance required is regular cleaning. We recommend using a suitable detergent and a microfiber cloth for stainless steel and glass surfaces. Do not use metal scouring pads, steel wool, or metal brushes.



SAFETY

When opening or closing your Vinorage wine cellar, always make sure that no one is standing near the lid. Pay extra attention if there are small children in the household — they may find the automatic lid fascinating. We recommend maintaining a safety distance of at least 50 cm from the edge of the lid.

Never leave your Vinorage wine cellar open after use, as this could pose a risk of someone with impaired vision or a curious child falling in and getting injured.

Do not allow children to use, play in, or climb into the wine cellar.

ENJOY YOUR VINORAGE WINE CELLAR
– AND YOUR WINE COLLECTION!
